## [46-49]

The pastoral tradition had its roots in nostalgia for the uncorrupted Garden of Eden and escape from the ills of the city. The Arcadia theme appeared in many paintings in which nature was idealized as a benevolent nurturer, mother, and provider. The 16th century French painting "St. Genevieve with Her Flock" depicts the virgin surrounded by a flock of sheep within a protective stone circle in the background. Here the female image of nature and the virgin, symbol of the earth spirit, are fused with the circular symbolism of order and protective encasement. Sandro Botticelli's "Birth of Venus" portrays
covered with a gown and wreath of flowers, both symbols of female fertility. In the 17th century, Nicolas Poussin and other landscape painters illustrated the transitory nature of the Arcadian experience by sometimes inserting a death's head into their works of art.

But (A) the pastoral tradition symbolized nature as a benevolent female, it contained the implication that nature when plowed and cultivated could be used as a commodity and manipulated as a resource. Nature, tamed and subdued, could be transformed into a garden to provide both material and spiritual food to enhance the comfort and soothe the anxieties of men distraught by the demands of the urban world and the stresses of the marketplace. It depended on a masculine perception of nature as a mother and bride whose primary function was to comfort, nurture, and provide for the well-being of the male. In pastoral imagery, both nature and women are subordinate and essentially passive. They nurture but do not control or exhibit disruptive passion. The pastoral mode represented a fulfillment of human needs for nurture, but by conceiving of nature as passive, it nevertheless allowed for the possibility of its use and manipulation.
46. Which of the following is most suitable for the blank (A)?
(1) in
(2) while
(3) that
(4) at
47. According to the passage, which of the following is NOT true?
(1) The pastoral mode was a model created as an antidote to the pressures of the urban world.
(2) The passivity of nature implies that nature can be manipulated as a resource.
(3) The Arcadian image of nature is irrelevant to a male-dominated society.
(4) In the Arcadia tradition, nature is represented as a benevolent female.
48. Why does the passage claim that Poussin's painting depicts the transitory nature of the Arcadia theme?
(1) Because he did not surround the female figure with the symbol of order and protective encasement
(2) Because he employed a feminine perception of nature
(3) Because he always portrayed the female figure in conjunction with the earth mother
(4) Because he inserted the image of death into his works

Traditional Polynesian navigation, also called non-instrument navigation or wayfinding, means (A) . Traditional voyagers would set out in a canoe in search of other islands, relying on their own knowledge and navigation techniques to reach land.

Locating a small island in the middle of the Pacific might seem a nearly impossible feat, but navigators get help from a variety of sources. First, most islands occur in groups. This makes the navigator's target more of a zone than a dot. Find any island in the group, and you can use it to find and navigate to the one you're looking for.

Birds are extremely helpful to a navigator in search of an island. Certain land-nesting birds fly out to hunt for fish in the morning and return to their nests in the evening, and are a helpful way to detect land. Not all birds make this daily commute between land and sea, however; so it's important to know one species from another. A typical Pacific island can be sighted on a clear day from about 10 miles away. Birds can significantly extend this detection zone. Terns range 30 miles from land, and masked boobies and frigate birds can range much farther, up to 100 miles from land. But don't trust every tern or booby you see. Individual and juvenile birds may not be nesting and may rove the oceans with freewheeling unpredictability.

Clouds are another sign of land. Clouds accumulate over islands, and an isolated pile of clouds on the horizon often signals the presence of land. Reflected light on clouds can be another clue. When sunlight (or moonlight) shines on white sand and shallow bays, the light can reflect upward, illuminating the base of low clouds with a silver or greenish glow.

Wave patterns, too, can be altered by the presence of land. Islands block, reflect, and refract ocean swells, creating distinct wave patterns that can help steer a seasoned navigator to land-especially helpful at night or when visibility is low. Bits of land vegetation such as seed pods or driftwood floating on the waves are yet another sign of land nearby.
50. Which of the following is most suitable for the blank (A)?
(1) moving around a website or computer screen, or between websites or screens
(2) planning and directing the route or course of a ship, using instruments or maps
(3) finding your way without any of the tools modern navigators take for granted
(4) following a path or route between an origin and a destination without using their navigation techniques
51. According to the passage, which of the following is NOT a source of help for navigators?
(1) an island in the group
(2) individual and juvenile birds
(3) reflected light on clouds
(4) wave patterns
52. According to the passage, which of the following is true?
(1) Traditional voyagers used to follow Polynesians' canoes to reach land.
(2) Navigators try to find an island as a dot rather than a zone.
(3) Accumulated clouds signal the presence of the horizon.
(4) Distinct wave patterns caused by islands help navigators find land.

Most people associate the office with routine and conformity, but it is fast becoming a source of economic uncertainty and heated dispute. Around the world, workers, bosses, landlords and governments are trying to work out if the office is obsolete. 84\% of French office workers are back at their desks, but less than $40 \%$ of British ones are. The head of Twitter says the company's staff can work from home "forever" but the founder of Netflix says home-working is "a pure negative". As firms dither, the $\$ 30$ trillion global commercial-property market is stalked by fears of a deeper slump. And while some workers dream of a (A)Panglossian future without commutes and McDonald's, others wonder about the threat to promotions, pay and job security.

This (B) $\qquad$ reflects uncertainty about how effective social distancing will be and how long it will take before a covid-19 vaccine is widely available. But it is about more than that: the pandemic has revealed just how many offices were being run as relics of the 20th century, even as it triggered the mass-adoption of technologies that can transform white-collar work. As a result, the
covid calamity will prompt a long-overdue phase of technological and social experimentation, neither business as usual nor a fatal blow to the office. This era holds promise but also brings threats, not least to companies' cultures. Instead of resisting change, governments need to update antiquated employment laws and begin reimagining city centres.
53. Which of the following is the closest in meaning to the underlined word (A)Panglossian?
(1) pedantic
(2) optimistic
(3) hungry
(4) intimidating
54. According to the passage, which of the following is true?
(1) Working in the office will be required once the covid-19 pandemic is over.
(2) Tech company bosses have similar views over the future of the workplace.
(3) A vast corpus of outdated employment law will need to be modernized.
(4) Government should play a guardian role to preserve the current system.
55. Which of the following is most suitable for the blank (B)?
(1) disagreement
(2) uniformity
(3) necessity
(4) harmony
56. What is the author's main purpose in writing this passage?
(1) to present food for thought on the future of the office
(2) to promote remote-working technologies
(3) to monitor remote workers to assess their productivity
(4) to investigate the cause of the pandemic in order to relocate offices in megacities

## [57-60]

The Oselvar is a small wooden rowing boat traditionally built and used along the west coast of Norway. The Oselvar is a clinker-built boat with thin, very wide planks. Almost all parts of an Oselvar are made of pine, with only the keel made of oak. [1]

This type of boat has been very common in the outer regions of Hordaland for hundreds of years. It was named after the major building site for this type of boat during the 18th century, at the mouth of the Oselva River in Os in Hordaland county. In the early 1800s, boat building was an important industry in Os and the neighboring
village of Tysnes, on the other side of the fjord. [2] The stylized figure of an Oselvar appears on the coat of arms of the municipality of Os.

Dating from at least the 1500 s and continuing until 1860, these boats were exported in kit form principally to the Shetland and Orkney islands. During the North Sea crossing, the wooden boats were taken apart and then 'flat packed' for shipping. [3]

Although the Oselvar was initially a working row or sail boat, it also has a long tradition as a leisure craft. A boat which could achieve both grace and speed was perfect for sailing and rowing competitions. [4] The first regatta was arranged by the Bergen Sailing Association on Midsummer's Day in 1871. Today several clubs and sailing associations are engaged in promoting the traditions of the Oselvar, both as a sports and leisure boat. In 2009, the boat was voted Norwegian national boat in a poll held by the Norwegian Society for Sea Rescue.
57. What is the author's main purpose in writing this passage?
(1) to explain the history of the Oselvar, a clinker-built boat
(2) to advertise the regatta held traditionally on Midsummer's Day
(3) to analyze the complicated structure of the leisure craft
(4) to discuss the style and popularity of the wooden boat
58. Which is the most appropriate tone of the passage regarding Oselvars?
(1) dubious
(2) factual
(3) apathetic
(4) derisive
59. Which is the most appropriate place for the sentence below?

Instead of sending complicated assembly instructions, they sent Norwegian boatbuilders to rebuild them.
(1) [1]
(2) [2]
(4) [4]
60. According to the passage, which of the following is true?
(1) Clinker-built boats were not popular in the outer regions of Hordaland.
(2) The keel of Oselvars is made of oak.
(3) The Oselvars were exported in one piece to neighboring islands.
(4) The regatta began in the 1500s.
